

Table of Contents

The TEExES Exams: General Information	4
Suggestions for the Day of the Exam	5
Multiple-Choice Test-Taking Strategies	6
Strategies for the TEExES.....	7
Learner-Centered Proficiencies	9
Cooperative Learning.....	10
Abbreviations and their Meanings	11
Bloom’s Taxonomy of Levels of Thinking	12
Code of Ethics and Standard Practices for Texas Educators	13
Field 115: Mathematics 4-8 Test Framework.....	15
Domain I – Number Concepts	26
Competency 1. Structure of Number Systems	26
Competency 2. Number Operations and Computational Algorithms	30
Competency 3. Number Theory	35
Domain II – Patterns and Algebra	30
Competency 4. Mathematical Reasoning.....	40
Competency 5. Linear Functions	45
Competency 6. Nonlinear Functions.....	51
Competency 7. Conceptual Foundations of Calculus Related to Middle School	61
Domain III – Geometry and Measurement	64
Competency 8. Measurement as a Process.....	64
Competency 9. Geometric Relationships and Axiomatic Structure of Euclidean Geometry	67
Competency 10. Properties of Two- and Three-Dimensional Figures.....	70
Competency 11. Graphical and Numerical Techniques.....	73
Domain IV – Probability and Statistics	78
Competency 12. Theory of Probability	78
Competency 13. Probability Theory	82
Competency 14. Relationship Among Probability Theory, Sampling and Statistical Inference.....	87
Domain V – Mathematical Processes and Perspectives	90
Competency 15. Mathematical Reasoning and Problem Solving.....	90
Competency 16. Mathematical Connections.....	94
Domain IV – Mathematical Learning, Instruction, and Assessment	97
Competency 17. Developing Mathematical Skills, Procedures, and Concepts	97
Competency 18. Planning, Organizing, and Implementing Instruction Using TEKS	99
Competency 19. Assessment.....	103
Sample Problems	108
Answers to Sample Problems	118
References.....	119
Glossary	121
